

SWIFT

RUSH

Features

- Available in 0.5T to 10T capacities with standard lift options to meet diverse lifting needs
- Fitted with high-strength load chains for enhanced durability and reliable load handling
- It ensures efficient use of vertical space, especially critical for low-ceiling environments
- Requires minimal hand chain pull, reducing operator fatigue and increasing productivity
- CE certified, ensuring safe and high-quality operation
- Designed as per IS 3832 design standards for reliable performance

Advantages

- Operates without electricity, suitable for factories, mines, farms, and construction sites
- Ideal for docks and warehouses with limited or no power access
- Compatible with monorail systems, jib cranes, or hand-travelling cranes
- Designed for handling large machinery and heavy components with safety and stability
- Adheres to EN 13157 and passes fatigue tests at 1.5 times of WLL for 1500 cycles

Benefits

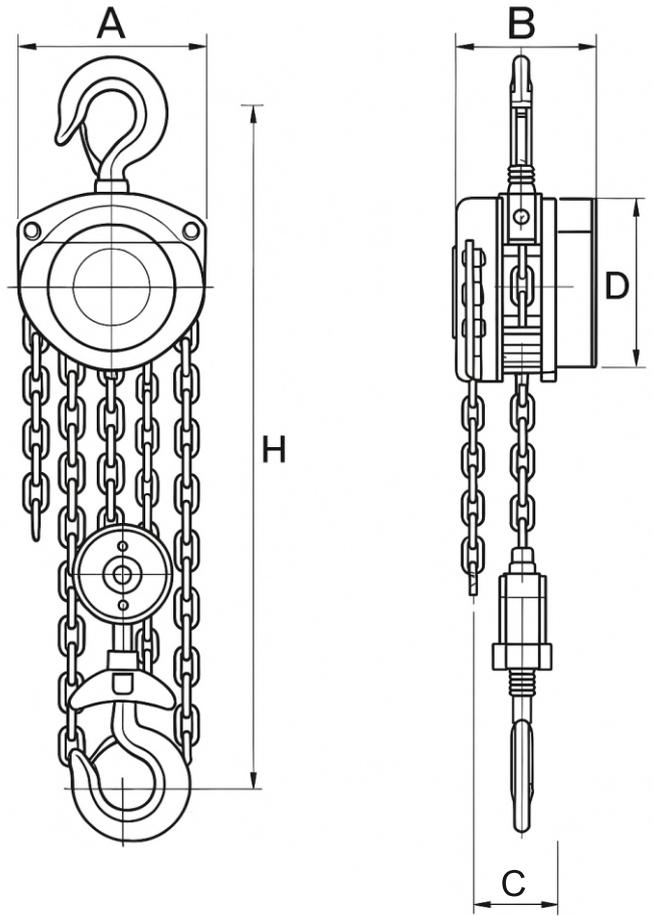

- Perfect for sites where power sources are unavailable/ inconsistent, ensuring seamless lifting
- Simple design with fewer wear-prone components ensures long-term reliability and safety
- Requires no special handling equipment to transport and deploy across different job sites
- Compliance with global standards ensures safety and long service life
- Reduces operational risk and liability through rigorous testing protocols
